

CS2300 – Database Project Final

Submission Rubric

Your project's final submission should follow the guidelines outlined in Phase 3 of the Database Project Guidelines, with your deliverable containing two files: the source code in a .zip archive as well as a report containing the sections outlined in Phase 3.

Total point value for the submission will be **150 points**, with point breakdown as shown below:

- **Project Report (50 points)**
 - Adequate revisions of problem statements and designs along with proper documentation of instructions and user manual.
 - *For more info, refer to the section Phase 3 in the general project description.*
- **Source Code (100 points)**
 - Proper implementation and usage of general database functionality (i.e. insertion, deletion, modification, search) as well as proper usage of structural database components (i.e. entities, keys, etc.).
 - Proper implementation of a file/script to create a new database instance.
 - Proper implementation of installation script (if needed).
 - *For more info, refer to the section Phase 3 in the general project description.*
- **(BONUS) UI Design (20 points)**
 - *Up to 20 bonus points* will be awarded as extra credit for a user interface (i.e. web interface, mobile app interface).
